

Why buy an ULTRALIFT™ Cover lifter?

EASY TO INSTALL

Ultralift cover lifters offer an extremely quick and straight forward installation. Choose any one of our four mounting systems and depending on which you prefer- you will not have to drill holes in your spa in order to mount it or drain the tub to slide the mount under the tub.

YOUR HEALTH

Less strain is exerted on your arms and back when you use a cover lifter. This is especially important for seniors, arthritis sufferers, and anyone with post-operative and/or sports related injuries. Why do all the heavy lifting when an Ultralift can do it for you?

ATTRACTIVE SPACE SAVING DESIGN

Our slim and sleek design complements any backyard ambiance. You don't need a lot of clearance to install and it keeps your cover off the deck minimizing damage to your cover, deck or lawn.

SEE MORE OF WHAT MATTERS

Look at your backyard, not your cover! Our visionlift system positions your cover fully behind your spa- leaving an unobstructed view of your yard, pets and children!

USE YOUR TUB MORE FREQUENTLY

Typically, removing a heavy hot tub cover is a two person job. A cover lifter makes removing the hot tub cover a fast and simple one-person task that enables you to enjoy your spa when you want. The easier it is to access the tub, the more memories you make with your friends and family.

PROTECT YOUR INVESTMENT

Ultralift cover lifters help prevent damage to your cover. Rips, tears and holes in your cover not only permit moisture and allow heat to escape from the spa (Which adds unnecessary heating costs to your energy bill), but such damage also diminishes the life of your spa.

AFFORDABLE ADDITION TO YOUR SPA

Your hot tub wasn't cheap. Neither was your cover. For a cover lifter's nominal cost you extend the life of your cover and spa.

MADE IN CANADA

You can rest easy knowing that products have met both Canada & the United States' health & safety standards. By manufacturing our product in Canada, we also reduce our carbon footprint and contribute to the enrichment of our communities.
